Title: Early Warning Apparatus For Acute Myocardial Infarction In The First Six Hours Of Pain. (CARDIOST)

Examiner/GAU Scott Getzow/3762

RESPONSE UNDER 37CFR1.116-
EXPEDITED PROCEDURE-

Bogotá D.C. , Colombia July 16, 2001

AMENDMENT B UNDER RULE 116

Assistant Commissioner for Patents
Washington, District of Columbia 20231

Sir:

In response to the Office letter mailed 2001 June 18 Applicant requests that the above application be amended as follows:

Claims: ~~cancel claims 3 and 4. Add the following claim 5, 6.~~
~~substitute claims 3 and 4 as follows:~~

A method for self-diagnosis of acute myocardial infarction at the moment of chest pain indicating ischemic activity for an early diagnosis, in the first four to six hours of said acute myocardial infarction to determine with a high degree of effectiveness when an artery of the heart is acutely obstructed by trombus or rupture of atherosclerotic plaque related to said ischemic activity by means of a device attached with a negative wire to the patient's right armpit, a positive/negative wire attached to

Handwritten notes and signatures at the top right, including "8/11/01" and "Please enter 56".
